Dear Sir,

New Year Greetings from Torque Technics Training Institute, Mumbai!

We at Torque Technics Training Institute conducts various Practical Training Program to enhance to practical and trouble shooting skills, while handling various Aux. Machineries on board ship. Apart from Practical Training, we also feel that, the respective candidate should have the required theoretical knowledge with basic fundamentals clear.

The combination of Good Practical knowledge and required Theoretical knowledge would not only enhance the practical skills but also analytical approach while trouble shooting. This would increase the confidence level of the candidate, reduce the downtime onboard ship, saving the cost and the time which might happen during breakdown maintenance.

In view of above, we are pleased to introduce new course ' Integrated Technical and Workshop Skill Upgradation Course'. This course would cover all the Technical aspects in regards of National and International Safety Regulations and Workshop Skills. The Theory Classes would cover all Theory Sessions and the practical sessions will be carried out on various Aux. machineries and equipments such as various types of Valves, Pumps, Purifier, Compressor, Electrical Motor and Electrical Equipment. Turbocharger, Aux. Engine, Main Engine Fuel Pump, Injectors, Exhaust Valves, Hydraulic and Pneumatic Valves, Pumps and Actuators, Refrigeration and Air Conditioning Machineries, Boiler Safety Valves, Boiler Burners, Gauge Glass etc.

We are sure that, after completing this course, the candidate would benefit from theoretical knowledge, helpful for his MEO Exams and in trouble shooting by analytical approach on board ship. This would decrease the failure rate on board ship and save cost and time.

We request Training Department to visit our institute put forward any suggestions and amendments. If the Training Program suits to you, we request you to refer the same to your Engineer Officers.

Thanking you!

Sincere Regards,

  
Pravin R. Marathe  
Incharge

Torque Technics Training Institute,

Mr. Sudhir Jakhadie  
Senior Faculty (Marine)
